1 Our involvement

1.1 The HWPC recognises its right to engage in the “promotion of economic, social or environmental well-being” of the Parish as a whole. This well-being power enables us to incur expenditure and specifically identifies the provision of financial assistance as one means of doing so.

1.2 In adopting a Health and Wellbeing Policy we undertake to:

- Work with individuals, groups, and communities to identify what matters to them, building on their strengths to improve health and wellbeing.
- Understand the local and accessible services and resources available to which people in the community can be signposted to support their health and wellbeing needs.
- Identify gaps in available services and resources preventing individuals and communities from achieving optimal health and wellbeing.
- Build relationships with local organisations and groups.
